

# Shoosh News

Check in with us on—

Each year we head down to Melbourne for Décor & Design—a fabulous gathering of suppliers, designers, artists and innovators.

An opportunity to see the latest trends in styling, furniture and décor—as well as catch up with our many suppliers and view their latest range.

Greens, soft earthy pinks and natural fibres continue to have a strong presence in many stories. There was a strong trend to ethnic prints and textiles coming through. Natural timbers are still strong, and the use of artificial plants to add that tropical feel to a room.

## Getting “Shooshed”

Where would we be without a great cushion! That simple item that can make or break a room—can change the look and feel of a bed. We select fabrics for our custom cushions that will help link all the elements of our design together, through colour, texture, patterns. Never under-estimate the impact that one item on the shopping list can make to your apartment!

Can some of the furniture in your apartments be re-furnished rather than replaced? This is the question we always try to ask our clients. Many of the older pieces we come across are still solid—but the timber may be in those orange and yellow tones that indicate to your guests they have been in the apartment for over 20 years. Some of these pieces can be painted to give them a new life and a stylish modern look to the apartment without the cost of replacement.
